SUMMARY

I am a Senior Front-End Developer with over 5 years of experience specializing in creating high-performance fintech platforms. My expertise lies in scalable React/TypeScript architectures, significantly impacting business outcomes. I've successfully led teams and designed innovative solutions that streamline processes, mentoring junior developers and fostering cross-functional collaboration in Agile settings.

EXPERIENCE

Senior Front-End Developer 01/2023 - Present

Ukrpay

Ukraine

Leading fintech company specializing in payment solutions.

- Architected merchant management platform serving 500+ merchants and processing 10,000+ daily transactions with zero downtime during 3x user growth.
- Designed and implemented a reusable component library with 40+ components, cutting feature development time by 40%.
- Optimized application bundle with code-splitting and lazy loading, improving initial page load by 35%.
- Impact: Platform scaled 3x with zero architecture rewrites.

Front-End Developer 03/2022 - 10/2022

Atlana

Ukraine

Real estate technology company focused on enhancing property search experiences.

- Developed interactive property search with Mapbox integration, geolocation filtering, and advanced faceted search.
- Created SEO-optimized listing pages using Next.js Static Site Generation, driving organic traffic growth.
- Achieved 95+ Lighthouse scores across Performance, Accessibility, Best Practices, and SEO.
- Impact: Reduced page load time by 50%.

STRENGTHS

★ Fintech Development

Expertise in developing high-performance fintech applications.

💬 Mentorship

Strong mentoring and coaching abilities, fostering junior developer growth.

⚡ User-Centric Solutions

Proficient in transforming complex requirements into user-friendly solutions.

KEY ACHIEVEMENTS

✅ Platform Scalability Achievement

Successfully scaled a fintech platform to 3x user growth without architectural rewrites, demonstrating outstanding problem-solving skills.

💡 No-Code Form Engine Development

Developed a no-code form engine that drastically improved product launch times from weeks to hours, showcasing innovative thinking and leadership.

Impltech

Ukraine

A tech company developing innovative solutions for real-time trading.

- Built a live trading interface streaming 50+ stock symbols simultaneously with <50ms UI update latency.
- Mentored 2 junior developers on WebSocket patterns and React performance optimization.
- Impact: Sustained 1,000+ price updates/second during peak trading hours with consistent sub-50ms rendering.

EDUCATION

Master's Equivalent in Applied Mathematics 09/2004 - 06/2009
